Companies Announcement Office
Australian Securities Exchange Limited

Birla Mt Gordon Production Update

Aditya Birla Minerals Limited advises that full year targeted production at its Mt Gordon operations is likely to be in the range of 11000-14000 tonnes.

The downgrade is a result of the Company having been rendered unable to meet the production targets for the relevant period. The Company is in discussions with the mining contractor in an effort to resolve the current production problems. The mine grade is at the expected level and the plant is performing as expected.

The Company will continue to keep the market informed as discussions ensue.
